SUMON SOURABH GHOSH

Quality Engineer with 2 years of experience testing SaaS applications, specializing in API validation, backend workflows, and system-level testing. Strong in exploratory testing, defect analysis, and ensuring product reliability across complex user flows. Experienced in Agile environments and validating data-driven systems. Interested in testing AI-powered applications with focus on accuracy, consistency, and edge-case handling.

WORK EXPERIENCE Tata Consultancy Services

Assistant System Engineer 06/2022 - 02/2024

- Worked in Agile Scrum teams, collaborating with developers, QA, and stakeholders across sprint cycles.
- Designed and executed functional, regression, and exploratory test scenarios for web applications.
- Performed API testing and backend validation by analyzing request/response flows and system behaviour.
- Reviewed requirements to identify edge cases, gaps in test coverage, and potential failure scenarios.
- Logged detailed defects with clear reproduction steps, impact analysis, and supporting evidence.
- Collaborated with developers for defect triage and root cause analysis.
- Participated in deployment validation, monitoring, and post-release verification.
- Validated system behaviour across different environments to ensure reliability and consistency.
- Performed data validation and consistency checks across workflows, ensuring accuracy of system outputs and API responses.

PROJECT

Self-Hosted Video Streaming Platform 2020 – 2024

- Designed and tested a Linux-based backend system handling authentication, media delivery, and session management.
- Performed end-to-end workflow testing including edge cases and failure scenarios.
- Conducted performance and scalability checks to identify system bottlenecks.
- Validated secure communication using SSL and Cloudflare routing.

Hand Gesture Controlled Mouse (Python) 2023

- Developed and tested a Python-based computer vision application for gesture recognition.
- Designed test cases for gesture accuracy, latency, and edge-case behaviour.
- Debugged inconsistent input issues by analyzing camera input and system behaviour.
- Analyzed system behaviour and edge cases to improve accuracy and reliability.

Voice-Controlled AI Assistant (Python) 2024

- Tested an AI-powered assistant integrating OpenAI APIs, validating response accuracy and edge cases.
- Performed API validation including error handling, timeouts, and unexpected input scenarios.
- Evaluated system behaviour for inconsistent outputs and failure cases.
- Tested system-level command execution with safety validations.

SKILLS

- Testing & QA
  - Functional, Regression, Exploratory Testing
  - Test Case Design & Defect Lifecycle
  - API Testing & Backend Validation
  - Data Validation & Edge Case Testing
  - Technical Skills
  - Python, REST APIs
  - Linux, SSL, Deployment Validation
  - Git & GitHub
- Concepts
  - SDLC / STLC
  - Agile / Scrum
  - System Behaviour Analysis
  - Performance & Scalability

Strong interest in testing AI-driven and data-intensive applications with focus on accuracy, reliability, and edge-case handling.

EDUCATION

Sathyabama Institute of Science and Technology

B. E / B. Tech in Electronics and Communication Engineering - 8 GPA 08/2018 – 09/2022

Bengal Institute of Technology and Management

Master of Technology 2024 - 2026
