SUMON SOURABH GHOSH

Backend-focused Software Engineer with 2+ years of experience at Tata Consultancy Services, specializing in Node.js, Python, REST APIs, and cloud deployments.

Strong experience in building scalable backend systems, secure API integrations, and deploying applications on Linux servers with AWS support.

Hands-on experience with AI integrations, system automation, and DevOps workflows, with a strong focus on performance, security, and end-to-end ownership.

WORK EXPERIENCE

Tata Consultancy Services

Assistant System Engineer — 06/2022 - 02/2024

- Developed and maintained backend services using Node.js and Firebase
- Built and integrated RESTful APIs for mobile applications (React Native, Flutter)
- Deployed backend systems on Linux servers with SSL/HTTPS security
- Worked with AWS services for hosting and infrastructure setup
- Participated in Agile development cycles, including sprint planning and reviews
- Performed deployment validation, debugging, and issue resolution
- Led a team of trainees, providing technical guidance and coordination

PROJECT

Nexus OSINT Platform (Latest Project) — 2025-26

- Built an OSINT (Open-Source Intelligence) tool for aggregating and analyzing public data
- Designed backend logic using Python/Node.js for data collection and processing
- Integrated multiple data sources and APIs for real-time intelligence gathering
- Implemented automation workflows and structured data extraction
- Focused on scalability, modular design, and performance optimization
- **Source Code**

Self-Hosted Video Streaming Platform — 2020 – 2024

- Built a complete backend system for user authentication, session handling, and media access
- Deployed on Linux server with SSL (HTTPS) and Cloudflare tunneling
- Managed DNS routing, secure traffic flow, and server configuration
- Conducted performance and load testing for scalability
- Owned full lifecycle: development - deployment – monitoring

Hand Gesture Controlled Mouse (Python) — 2023

- Developed a real-time computer vision system using gesture recognition
- Optimized performance and handled edge-case inputs
- **Source Code**

EDUCATION

Bengal Institute of Technology and Management **2024-26**

- M.E / M.Tech in Electronics and Communication Engineering

Sathyabama Institute of Science and Technology **2018-22**

- B.E / B.Tech in Electronics and Communication Engineering

TECH STACK

- Languages: Python, JavaScript (Node.js)
- Backend: Node.js, Express, REST APIs, Authentication (JWT)
- Frontend (Working Knowledge): React Native, Flutter
- Databases: MongoDB, Firebase (NoSQL), Basic SQL
- DevOps & Cloud: AWS, Docker, Linux, CI/CD (basic)
- Tools: Git, GitHub, Postman, Cloudflare
- Concepts: Microservices, API Design, System Design, Authentication, Deployment

SKILLS

Python
Backend

Linux Servers

Node.js

- Python
- JavaScript & Node.js
- REST API Development
- Backend Authentication & Authorization
- Linux Server Administration
- SSL / HTTPS Configuration
- Cloudflare DNS & Tunneling
- Docker and AWS
- Git & GitHub
